

DBMS End Semester Submission

DB of a messaging system to friends and groups

Team Members

Aditya Peer(2020355)
Ayush Raje Chak(2020502)
Shreya Bhatia(2020542)
Shrugal Tayal(2020408)

Mentor:

Dr.C. Anantaram
Kinshuk Chopra

Project Scope

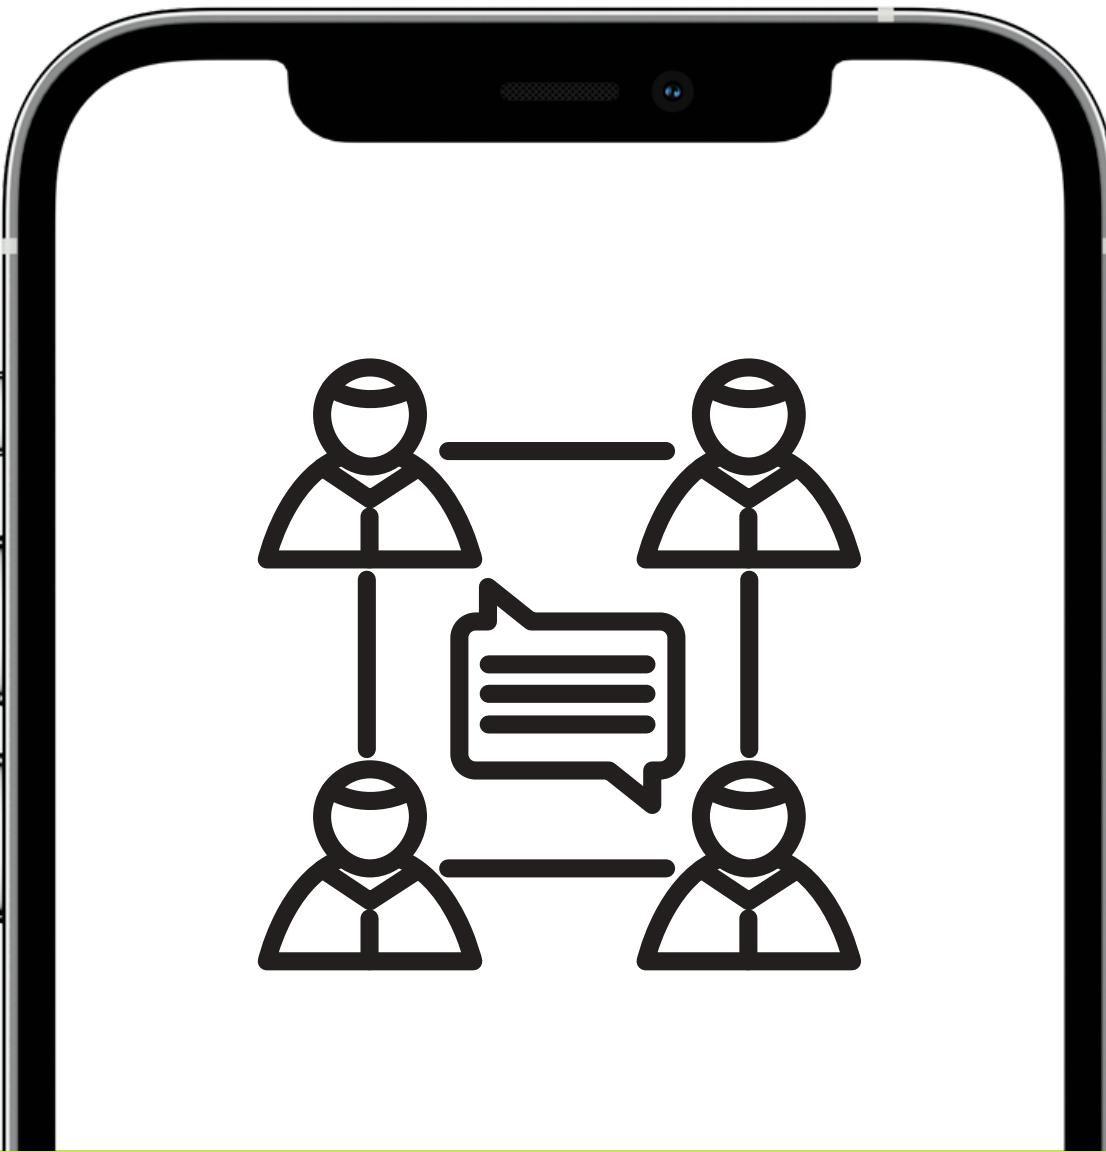

- 01** Users can send messages/media to other users
 - Either through dM
 - Or on a group
- 02** Users can create a group
- 03** Admin view, normal member view
- 04** Users can make changes in their profile
- 05** Block/unblock contacts
- 06** Save contacts
- 07** Search through contacts

Project Scope

- 08** Delete chat messages
 - For everyone
 - For me
- 09** Share messages with $n \geq 1$ contacts
- 10** Show unread messages in a chat

- 11** Notifications (future scope)
- 12** And other settings

Stakeholders

Internal Stakeholders

Comprises of the owners, managers, employees, and investors of a company.

External Stakeholders

Individual or group of users acting in the capacity of the customers, competitors, suppliers, creditors, public, and the government.

Entities

- **User**(uid, bio, phone number, name)
- **Grp**(group_id, group_name, date, creator_id)
- **User_group_info**(user_id, group_id, is_admin)
- **Contacts**(id, user_id, contact_person_id,saved_by_name, is_blocked, is_saved)
- **Message**(mssg_id , sender_id , message_body, time, date, visible_to_me)
- **message_recipient**(mssg_id,reciever_id, receiver_group_id, is_read, status)

Relationship with attributes

- `user_group_info(user_id, group_id, is_admin)`

E-R diagram into relational schemas

- **User**(uid, bio, phone number, name)
- **Grp**(group_id, group_name, date, creator_id)
- **user_group_info**(user_id, group_id, is_admin)
- **Contacts**(id, user_id, contact_person_id, saved_by_name, is_blocked, is_saved)
- **Message**(mssg_id , sender_id, message_body, time, date,visible_to_me)
- **message_recipient**(id, mssg_id,reciever_id, receiver_group_id, is_read, status)

Ternary Relation

In the Ternary relationship, there are three types of entity associates. In our updated model there is not any Ternary relationship that exists where there are three types of entity and we call them a degree of relationship is 3.

Since in our updated model the number of entities increases due to this, it becomes very complex to turn E-R into a relational table.

Data Population & DDL

106	1005	heloooo	4:05:55	2021-10-04	TRUE
107	1006	heyyy	16:14:30	2021-10-05	TRUE

Message Table

- `INSERT INTO message(mssg_id, sender_id, message_body, time, date, visible_to_me) VALUES (101, 1004, 'hi', '10:11:12', '2021-09-29', TRUE);`
- `INSERT INTO message(mssg_id, sender_id, message_body, time, date, visible_to_me) VALUES (102, 1002, 'hello', '5:46:40', '2021-09-30', TRUE);`
- `INSERT INTO message(mssg_id, sender_id, message_body, time, date, visible_to_me) VALUES (103, 1001, 'hey', '11:19:05', '2021-10-01', TRUE);`
- `INSERT INTO message(mssg_id, sender_id, message_body, time, date, visible_to_me) VALUES (104, 1011, 'hi there', '7:16:47', '2021-10-02', TRUE);`
- `INSERT INTO message(mssg_id, sender_id, message_body, time, date, visible_to_me) VALUES (105, 1001, 'hiya', '6:54:07', '2021-10-03', TRUE);`
- `INSERT INTO message(mssg_id, sender_id, message_body, time, date, visible_to_me) VALUES (106, 1005, 'helloooo', '4:05:55', '2021-10-04', TRUE);`
- `INSERT INTO message(mssg_id, sender_id, message_body, time, date, visible_to_me) VALUES (107, 1006, 'heyyy', '16:14:30', '2021-10-05', TRUE);`

Message Recipient Table(Weak Entity)

```
CREATE TABLE Message_recipient (
mssg_id INT,
receiver_id INT NOT NULL,
receiver_group_id INT,
is_read BOOLEAN DEFAULT FALSE,
status VARCHAR(10),
CHECK( (is_read, status) <> (true, 'not sent') )
);
```

This entity cannot be uniquely identified by its attributes alone.

It uses a foreign key in conjunction with its attributes to create a primary key. It is dependent on messg_id and receiver_id.

»

mssg_id	receiver_id	receiver_group_id	is_read	status
101	1001	10	TRUE	sent
101	1010	10	TRUE	sent

```

}}

SQL Queries

https://docs.google.com/document/d/1Xz9JvDSpNLDJl2uTN9QBiRH5F49SpG_L-NWRNrCYbVc/edit?usp=sharing

»

Socialite DB

user view: make changes in their own bio

User 'x' can see his/her account info (like bio, phone_No, user name)

```
CREATE VIEW user_profile AS  
SELECT name, phone_number, bio  
FROM user  
WHERE user_id=x;
```

»

Socialite DB

User x can view user y's bio, phone number, actual name -> (parts of the user profile)

```
SELECT phone_number, bio, name  
FROM user  
WHERE user_id = 1005 and ( SELECT count(contact_person_id)  
    FROM contacts  
   WHERE user_id = 1001 and contact_person_id = 1005);
```

»

Socialite DB

For a user 1014 get all of their saved contacts(o/p: 1002, 1003, 1008, 1006)

```
Select contact_person_id, saved_by_name  
From contacts  
Where user_id=1014 and is_saved = TRUE;
```

»

Socialite DB

For a user X = 1014 get the actual names of all of their blocked contacts(O/P 1003, 1008)

Select U.name ,U.uid

From user as U, contacts as C

Where C.user_id = 1014 and U.uid = C.contact_person_id and is_blocked = TRUE;

»

Get all the messages from a Direct chat between user xxxx and user yyyy

```
SELECT M.mssg_id, M.message_body, M.sender_id, M.time, M.date  
FROM message as M, message_recipient as R  
WHERE (M.sender_id = 1001 or M.sender_id = 1005)  
AND (R.receiver_id = 1005 or R.receiver_id = 1001)  
AND (receiver_group_id is null)  
AND (M.mssg_id=R.mssg_id);
```

Socialite DB

Retrieve information of all the groups that a user belongs to :

```
SELECT group_name, date, creator_id  
FROM grp as G, user_group_info as I  
Where I.user_id = 1001 and I.group_id = G.group_id;
```

»

Socialite DB

Group by group ID and count the number of members in each group, order by high to low

```
SELECT COUNT(user_id), group_id  
FROM user_group_info  
GROUP BY group_id  
ORDER BY COUNT(user_id) DESC;
```

»

Socialite DB

Can make other users admin:

```
SET SQL_SAFE_UPDATES = 0;  
UPDATE user_group_info  
SET is_admin = TRUE  
WHERE user_id=1004;
```

»

Socialite DB

Change group's name

```
SET SQL_SAFE_UPDATES = 0;  
select*from grp;  
UPDATE grp  
SET group_name = 'csd'  
WHERE group_id=19;
```

»

Socialite DB

User x sends a message on group XABCD (message is created, sent on a group)
(constraints: create date of message cant be before that of the group, x should be a member of the group)

```
INSERT INTO message(sender_id, message_body, time, date, visible_to_me)
VALUES( 1001, '20th is my bday', '09:09:09', '2022-03-01', TRUE);
```

```
INSERT INTO message_recipient(receiver_id, receiver_group_id)
SELECT distinct user_id, group_id FROM user_group_info
WHERE group_id = 20 and user_id <> 1001;
```

```
UPDATE message_recipient
SET mssg_id =108
WHERE receiver_group_id = 20 and mssg_id is null and status is null;
```

»

Socialite DB

A delete message query

display sender's name on a message in a group

display the names and bio's of a memberin each group

»»

Embedded SQL queries

```
DELIMITER //
CREATE procedure showView ()
BEGIN
    SELECT * FROM user_profile;
END //
```

```
DELIMITER ;
CALL showView();
```

Embedded SQL queries

get the number of unread messages in a group for a particular member

```
DELIMITER //
CREATE procedure unreadMssgsInaGrp (IN rid INT, IN gid INT, OUT unreadMssgs INT)
BEGIN
    SELECT count(mssg_id) INTO unreadMssgs FROM message_recipient WHERE
receiver_group_id = gid AND receiver_id = rid AND is_read = FALSE;
END //
DELIMITER ;
```

```
CALL unreadMssgsInaGrp(1013, 10, @unreadMssgs);
SELECT @unreadMe
```

»

Embedded SQL queries

```
DELIMITER //
CREATE procedure getUser(IN phone FLOAT, OUT userid INT)
BEGIN
SELECT uid INTO userid FROM User WHERE phone_number = phone;
END //
DELIMITER ;

CALL getUser(1000000000, @userid);
SELECT @userid;
```

Embedded SQL queries

for a particular user, order all their groups by their created dates

```
DELIMITER //
CREATE procedure inCreationOrder()
BEGIN
SELECT * FROM grp$lnOrder
END //
DELIMITER ;
```

```
CALL inCreationOrder();
SELECT @group_id;
```

»

Embedded SQL queries

VIEW : for a particular user, order all their groups by their created dates

```
CREATE view grpInOrder AS  
SELECT group_id FROM user_group_info as U NATURAL JOIN grp as G WHERE user_id = u  
AND G.group_id = U.group_id ORDER BY(date) DESC;
```

Roles and Users

```
create role grp_admin;
```

```
create role chatter;
```

```
//user: root (administrator)
```

```
create user peter@localhost identified by 'jpt12345';
```

Views and Grants

```
GRANT CREATE, CREATE VIEW, DROP, SELECT, TRIGGER, DELETE ON *.* TO
chatter;
GRANT INSERT ON message TO chatter;
GRANT INSERT ON message_recipient TO chatter;
GRANT CREATE ROLE ON *.* TO chatter;
GRANT UPDATE on message_recipient TO chatter;
GRANT INDEX, GRANT OPTION on *.* to chatter;
GRANT grp_admin TO peter@localhost;
GRANT chatter TO peter@localhost;
```

Views and Grants

```
CREATE VIEW user_profile AS  
SELECT name, phone_number, bio  
FROM user  
WHERE user_id=x;
```

```
create view group10 as  
select group_name, date, creator_id  
from grp  
where group_id=10;
```

```
grant update(group_name) on grp to grp_admin;
```

```
create view group_info as
select U.name, U.bio
from user_group_info as G NATURAL JOIN user as U
where G.group_id= <g> AND G.user_id = U.uid;
```

```
create view numOf_grp_members as
SELECT COUNT(user_id), group_name, group_id
FROM user_group_info
GROUP BY group_id
ORDER BY COUNT(user_id) DESC;
```

Indexing

```
query: """CREATE INDEX message_sender ON message (sender_id);"""
```

Indexing is used in the message table by creating an index table of message_sender to quickly search the sender_id in the message table.

```
query: """CREATE INDEX message_reciever ON message_recipient (receiver_id);"""
```

Indexing is used in the message_recipient table by creating an index table of message_reciever to quickly search the receiver_id in the message table.

```
query: """CREATE INDEX user_grp ON user_group_info (user_id, group_id);"""
```

Indexing is used in the user_group_info table by creating an index table of user_grp to quickly search among the user_id and group_id in the user_group_info table.

```
query: """CREATE INDEX login ON user (name,phone_number);"""
```

Indexing is used in the `user` table by creating an index table of `login` to quickly search among the `phone_number` and `name` in the `user` table.

```
query: """CREATE INDEX known_ppl ON contacts (user_id,contact_person_id);"""
```

Indexing is used in the `contacts` table by creating an index table of `known_ppl` to quickly search among the `user_id` and `contact_person_id` in the `contacts` table.

Triggers

```
# after insert trigger
```

```
Delimiter //
```

```
CREATE TRIGGER check_sender AFTER INSERT ON message
